DETAILED ACTION

1. Applicants' election of group I, claims 1-4, 7-12 and 21-31 has been noted. Claims 32 and 33 are included with group I. Claims 14-20 are withdrawn from consideration.

Claim Objections

2. Claim 29 is objected to because of the following informalities: the claim recites "said pillows" and that limitation is not recited in the independent claim 21 on which it is dependent. It seems that the claim should be dependent on claim 28 instead of claim 21. For Examining purposes the Examiner assumes that this was an error and that the claim is indeed dependent on claim 28 instead of claim 21. Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4, 7-12 and 21-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,562,740. Although the conflicting claims are not identical, they are not patentably distinct from each other because

the independent claim 1 of the present application and claim 1 of US 6,562,740 both comprise a nonwoven fabric layer, a heat shrinkable thermoplastic film intermittently bonded together by an adhesive in a predetermined pattern and that upon heating the film shrinks and the nonwoven fabric gathers to form pillows. The only difference in the present application is that the adhesive is applied to the nonwoven fabric and in the '740 patent, the adhesive is applied to the film. It is noted that the final product is not affected by applying the adhesive to the nonwoven fabric versus the film, since both layers are bonded intermittently and upon heat application the film shrinks in the same manner gathering the nonwoven fabric and forming the pillows. Therefore, the application of the adhesive to the nonwoven or to the film is considered by the Examiner as a process limitation that does not affect the final product being claimed and not a product limitation since the final product of the present application has the same structure as the shrink wrap of the '740 patent. Further, the same applies for claim 21 of the present application and claim 6 of the '740 patent.
